

Aller Norka

Aller is a modular luminaire mounting rail system for high ingress protection (IP54) lighting solutions equipped with T5 fluorescent lamps. Possible applications range from logistics centres and industrial plants to food and pet food processing facilities that meet HACCP/IFS and GMP standards.

Available in three basic versions for installation heights up to 21m, the Aller system includes the proven, low-maintenance and adjustable Norka reflector tubes. Depending on the installation height and the required illumination level, the Aller system comes in single lamp, twin lamp and triple lamp versions.
